

Section II: Schedule of Requirements

eSourcing reference: RFQ/2026/64721

A. Summary of Requirements

Line item/ lot N°	Description of goods	Quantity
1	Unbundled Scope 3 Sustainable Aviation Fuel (SAFcE) certificates, from CORSIA eligible fuels (CEF),	delivering 145 t CO2 reductions

SAF = Sustainable Aviation Fuel = Sustainable aviation fuels are renewable or waste-derived aviation fuels with significantly lower emissions than conventional aviation fuels

SAFc = SAF certificate = one certificate represents the right to claim environmental attributes associated with one metric ton of unblended, certified SAF.

SAFcE = a SAF certificate to be used for Scope 3 emission claims only, unbundled from the corresponding SAFcA certificate that represents the Scope 1 emission claims for the airline.

CEF = CORSIA eligible fuels = fuels produced by suppliers certified under ICAO's Sustainability Certification Schemes (SCS) qualify.

B. Detailed technical specifications

UNOPS is looking at procuring high-integrity, unbundled certificates of sustainable aviation fuel (SAF) representing indirect (Scope 3) emission reductions - also known as SAFcE - through a Book and Claim system in the voluntary market. **UNOPS objective is to claim environmental attributes equivalent to approximately 145 t CO2e, and might adjust the quantity of SAFcE accordingly.**

These attributes will be used as an in-sector reduction (or inset) to reduce the 2026 greenhouse gas (GHG) emissions generated from the consumption of conventional aviation fuel as part of UNOPS business travel (cat.6 in the Greenhouse Gas Protocol Corporate Value Chain Standard).

Technical requirements:

The SAFcE offered must conform to the following requirements:

1. Only unbundled SAFcE are accepted for this tender.
2. The certificates must be based on CORSIA eligible fuel (CEF) - i.e. produced by suppliers certified under ICAO's Sustainability Certification Schemes (SCS) at the time of delivery¹.
3. The bidder must confirm that the SAF was produced in adherence with the 14 CORSIA Criteria for Certified SAF (ref. "[ICAO CORSIA Sustainability Criteria For CORSIA Eligible Fuels](#)", chapter 2)
4. SAFcE derived from feedstocks designated as high indirect land-use change (ILUC) risk², such as palm oil and soybeans, are not eligible under this tender.

¹ As of June 2026, the following were ICAO approved SCS: RSB, ISCC, ClassNK SCS and Bonsucro.

² As defined by the [EU Commission Delegated Regulation \(EU\) 2019/807, as amended](#).

5. The bidder must produce a Proof of Sustainability (PoS) for every batch underlying the offered SAF volume, including information on the methodology and life cycle GHG emissions value
6. The bidder must confirm that the transaction will be recorded in UNOPS name in a recognised Sustainable Aviation Fuel registry (such as the CADO SAF Registry, the SAFc Registry, or the RSB Registry or in another equivalent registry (indicate where). UNOPS reserves the right to decline a registry that is not deemed equivalent
7. The bidder must produce a Declaration of no double claiming, including evidence of their approach to prevent double issuance and double use across other registries
8. SAFcE must be issued or unbundled no more than 12 months prior to the placement of the PO
9. The successful bidder must permanently retire and cancel the attributes purchased by UNOPS

Other requirements:

- a. UNOPS will accept partial bids, if a bidder does not offer the whole quantity of SAFcE.
- b. If the lowest priced most technically acceptable does not fulfil UNOPS volume requirements, UNOPS will procure additional SAFcE needed from the second lowest priced most technically acceptable offer, and so proceed until its needs are fulfilled.
- c. UNOPS reserves the right to vary the quantity of the SAFcE in the measure of 10%, without any change in the unit prices or other terms and conditions of the RFQ. In case UNOPS or its partners request variations in excess of 10%, there will not be an obligation to maintain the unit price.

C. Delivery requirements and Comparative Data Table

UNOPS Requirements	
Delivery place and time	The supplier/trader must ensure that the certificates purchased by UNOPS are available and will be permanently cancelled and retired from circulation within 2 weeks from the date of signing the contract. Proof of cancellation / evidence in the form of the registry serial numbers/unit block IDs and a screenshot of a Registry confirming the certificate's cancellation on behalf of UNOPS shall be sent to UNOPS.
Consignee details	UNOPS
UNOPS Right to vary requirements	UNOPS reserves the right to vary the quantity of the certificates in the measure of +/-10%, without any change in the unit prices or other terms and conditions of the RFQ.
